

مشاريع التخرج للعام الدراسي 2016/2017

اسم المشروع	ت
Safe Distance Estimation from Mobile Base Station Radiation	1
Design and Implementation of Home Security System	2
Design and Implementation RFID Based Access Control System Using 8051 Microcontroller	3
Design and Implementation Digital Voltmeter Based on 8051 Microcontroller	4
Design and Implementation of Line Follower Robot	5
Design and Implementation of Plotter Machine	6
MIMO Antenna Design and Performance Evaluation	7
Case Study on the Applications of IoT	8
Vehicle Movement Based Street Lights with External Light Sensing	9
Design and Simulation of 12V and 220V Inverter for AC Motor Speed Control	10
Single-band/Dual-band Microstrip Antennas Based on Fractal Geometry: Design and Simulation Results	11
Design and Performance Evaluation of Wearable Conformal UHF RFID Tag for Wireless Body Area Network	12
Design and Implementation of FIR Digital Filter on FPGA	13
Design and Implementation of Car Park Management System Based on RFID Technology	14
